

No. 276 DIN type Abrasion Tester

■ APPLICATION

The **DIN type Abrasion Tester** evaluates abrasion resistance of rubber specimen. Abrasive paper is wound on the surface of a rotary drum, specimen subjected to load is placed on it and evaluation is made from the amount of rubber lost.

■ SPECIFICATIONS

Diameter of drum	150mm (one turn approx. 400mm)
Dimensions of sample	Ø16.0±0.2mm x thickness 6 to 10mm
Sample feed speed	4.2mm / one turn
Test load	2.5 to 20N
Drum revolutions	40rpm
Power requirement	Single-phase, AC100V, 50Hz or 60Hz, 0.5kVA
Dimensions	W950 x D330 x H380mm
Weight	Approx. 50kg
Related standards	JIS K 6369, K 6264 DIN 53516 ISO 4649

Specifications are subject to change without notice.
