

236 | Tackiness Checker Model HTC-1

Measurement unit (Aluminum R ring, model AL-R1)

APPLICATION

The Tackiness Checker, HTC-1, is a convenient, easy-to-use instrument which was developed to allow an on-site testing of the tackiness of rubber components. The instrument may also be used to test the tackiness of adhesive tapes, depending on the application.

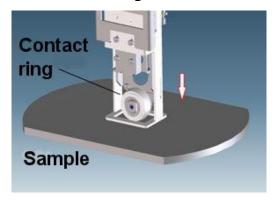

In the molding process of tires and belts, where components including rubber and reinforcing materials are bonded in multiple layers and vulcanized, it is very important to check those components' tackiness before the forming process is completed. The Tackiness Checker HTC-1 provides a simple and portable method for an accurate, on-site testing.

FEATURES

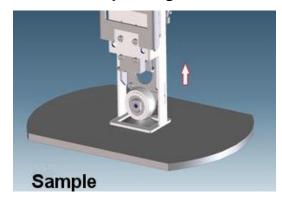

- Portability for its compact and light-weight unit (1.3kg)
- Measuring the tackiness of samples at production sites
- Conducting a test by simply pressing down the measurement unit of the instrument on samples
- Rotating the contact ring by each test with the ratchet mechanism
- Cleaning the contact ring on the cleaning mode easily
- Measuring sample surface temperature (option)

SPECIFICATIONS

Model	HTC-1		
Tackiness measuring method	Load cell method, Max 20N , resolution 0.1N		
Press force	Standard: 10N (Selectable between 5 to 12N)		
Press time	3 sec / 6 sec (two choices)		
Number of measuring times	1 / 3 / 5 times (three choices)		
Contact ring moving speed (Down and up)	Approx. 2.3mm/sec.		
Contact ring	Aluminum R ring, Model: AL-R1, Point contact		
Measuring times per a test	Approximately 7 seconds when pressing time is 3 seconds		
Contact ring drive	Brushless DC motor		
Contact ring rotation	Auto rotation function		
Minimum sample size	50 x 50mm		
Test condition (input)	Sample name (4 digits)		
	Test results display (median or average if multiple)		
	Number of times (1, 3, 5)		
	Press time (3 sec or 6 sec)		
Calendar function	Date, Time (yyyy/mm/dd hh:mm), auto refresh until 2099		
Battery	Lithium ion battery 7.4V, 2000mA		
Power consumption	Standby: 550mW, Motor drive: 800mW		
Dimensions	W118 x D72 x H222mm		
Net weight	Approx. 1.3kg		

ACCESSORIES/SPARE PARTS & OPTIONAL FEATURES

Standard OOption

Name	Model	Photo	HTC-1
	(Part No.)		
Aluminum R ring (Aluminum curvature surface ring)	AL-R1		•x1
Aluminum flat surface ring Features larger contact area than aluminum R ring for increased tackiness value	AL-F1		0
Flat surface ring	AL-M1		0
Built-in thermopile radiated temperature sensor ■ Measurement range: 5 to 40°C (Resolution: 1°C) Note: This sensor is adjusted to the radiation rate of rubber (=0.95). Temperature of materials with a different radiation rate cannot be correctly measured.	ST-1		0
Carrying case For storage of main instrument and attachments	KS-1		0
